                                                                                                                                                                                                                                                                                                                                                            밁
                                                                                                                                                                                                                                                                                                US-09-419-568F-7
APPLICANT: Louhed, Jamila
APPLICANT: Renauld, Jean-Christophe
APPLICANT: Renauld, Jean-Christophe
TITLE OF INVENTION: Isolated Nucleic Acid Molecules which Encode T Cell Inducible
TITLE OF INVENTION: (TIF8) The Proteins Encoded, and Uses Thereof
TITLE OF INVENTION: (1981).

CURRENT APPLICATION NUMBER: US/09/419,568F
CURRENT APPLICATION NUMBER: US09/354,243
PRIOR APPLICATION NUMBER: US09/354,243
PRIOR APPLICATION NUMBER: US09/354,243
PRIOR APPLICATION NUMBER: US09/373
PRIOR TILING DATE: 1999-07-16
PRIOR PRICATION NUMBER: US09/178,973
                                                                                                                                                                                                                                Sequence 7, Application US/09419568F
Patent No. 6331613

Sequence 7, Application US/09354243B

Patent No. 6359117

GENERAL INFORMATION:
APPLICANT: Dumoutter, Laure
APPLICANT: Louhed, Jamila
APPLICANT: Renauld, Jean-Christophe
TITLE OF INVENTION: (TIFB)

TITLE OF INVENTION: (TIFB)

TITLE OF INVENTION: The Proteins Encoded, and Uses Thereof
FILE REFERENCE: LUD 5543.1

CURRENT FILING DATE: 1999-07-16

PRIOR APPLICATION NUMBER: US/09/354,243B

CURRENT FILING DATE: 1999-07-16

PRIOR APPLICATION NUMBER: US/09/178,973

PRIOR FILING DATE: 1998-10-26

NUMBER OF SEQ ID NOS: 29
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      B
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Ś

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          Inducible
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  0
                                                                                                                       Sequence 9, Application US/09178973B
Patent No. 6274710
GENERAL INFORMATION:
APPLICANT: Dumoutier, Laure
APPLICANT: Louned, Jamila
APPLICANT: Femauld, Jean-Christophe
TITLE OF INVENTION: Isolated Nucleic Acid Mol-
TITLE OF INVENTION: Isolated Nucleic Acid Mol-
TITLE OF INVENTION: The Proteins Encoded, an
FILE REFERENCE: LUD 5543
CURRENT APPLICATION NUMBER: US/09/178,973B
CURRENT FILING DATE: 1998-10-26
NUMBER OF SEQ ID NOS: 17
SEQ ID NO
LENGTH: 1111
TYPE: DNA
GRGANISM: Mus musculus

Sequence 29, Application US/09354243B
Patent No. 6359117
GENERAL INFORMATION:
APPLICANT: Dumoutier, Laure
APPLICANT: Louhed, Jamila
APPLICANT: Louhed, Jamila
TITLE OF INVENTION: Isolated Nucleic Acid Molecules which Enc.
TITLE OF INVENTION: (TITE)
TITLE OF INVENTION: The Proteins Encoded, and Uses Thereof
FILE REFERENCE: LUD 5543.1
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               밁
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         Ś
